Alexandria, VA 22313-1450

Dear Sir:

Applicant is submitting herewith three references, all of which are listed in the enclosed PTO-1449 form. Applicant respectfully requests these references to be considered during the prosecution of the above-captioned patent application.

French Publication 2 700 809, one of the above-mentioned references, discloses a slide pumping mechanism for a cooling product, most notably a liquid. This pumping mechanism allows means for pumping to a variable volume chamber 12 furnished with at least one orifice of aspiration 2a with a valve 2 and at least one orifice of repression/drive-back 4a with valve 4. The same means of pumping is provided with the means of operation, activated by an alternating back and forth movement. Distinguished in that the means of operation includes a pipe 3 joined together with a variable volume chamber and capping by an air tight or waterproof means. The above-mentioned orifice of repression/drive-back for 4a with the valve 4 and pipe 3 form a pipe to pump out the water for the driven-back cooling product.
